NEWSSTANDS WOMEN OF DISTINCTION

Swimming Pools by Jack Anthony, now in its second generation, still takes enormous pride in serving Long Island communities. "Exceeding our clients' expectations has always been our primary goal," says Michael Inzerillo, vice president. "We're consistently at the top of our industry, pushing the envelope when it comes to designing and building."

Swimming Pools by Jack Anthony has the industry recognition to back up that statement! They've won numerous design-and-build awards from the Association of Pool and Spa Professionals, including three golds, three silvers and two merit awards for outstanding achievements in the last four years alone.

What's the key to continuously achieving these goals? "Our on-site project supervision, along with experienced staff that follow through with a well-organized, well-scheduled and well-communicated construction process," says Inzerillo. He also notes this helps his clients achieve an enjoyable experience, one which they will talk about and recommend for years to come!

Swimming Pools by Jack Anthony offers complete renovation to existing pools and spas, such as new coping, tile, marble dusting, liner replacements and patio work—all without the use of subcontractors. They also offer weekly maintenance programs, summerizations and winterizations. From design to completion, each project is meticulously executed.
